David King, Chairman of the Chicago Board of Trade, was there for the purpose of identifying the prisoners. United States District Attorner J. Kearney Rice looked after the interests of the Government. Postal Inspector William H. Larmour had a large number of complaints and some documentary evidence, which he was prepared to produce if the prisoners insisted upon an examination. They did not insist, however. Their lawyer, James J. Furey, waived examination, and Mo-Clure and Dr. Craig expressed their willingness to go back to Chicago for triat. Lawyer Furey saked Commissioner Rowe to fix the amount of ball. District Attorney Rice suggested that the amount be made \$10,000 in each case, but Commissioner Rowe fixed it at \$7,000. The prisoners were unable to furnish that amount and were taken back to jail. They will be taken to chicago to-morrow. The specific charge against them is using the United States mails for fraud-

nient purposes. The Government officials declare that these men and the three others now in custody in Chicago, James F. McClure, William Thomas, and J. I. Tallman, comprise one of the boldest

Chicago, James F. McClure, William Thomas, and J. I. Taliman, comprise one of the boldest and most successful swindling concerns in the county. It is alleged that they have run a fake lottery a bogus mining exchange, and a fake lottery a bogus mining exchange, and a fake lottery a bogus mining exchange, and a chain of "bucket shops." Each time they changed their line of business they adopted a new irm name. At different times it was Craig & Co. Patterson & Co., Thomas & Co. The branch office in this city, at 45 Broadway, was run under the name of J. M. Morgan & Co. Several indictments were found against the sleed windlers in Chicago last winter, but they have nover been prosecuted.

McClure is about 30 years old, honest looking, and he has the appearance of a prosperous broker. Inspector larmour had six complaints yesterday against McClure and Dr. Craig. If they had stood examination on one and been discharged, the others would have been brought up in turn. Neither of the prisoners had much money when they were brought to she county jail, but it is said that McClure has \$100,000 deposited in bank to the credit of his wife.

McClure and Dr. Craig both say that they were never engaged in any but legitimate business and that they never awindled anybody. They contend that they will be able to clear themselves when they are brought to trial. CSICAGO, Aug. 10.—William A. Thomas, John I. Tallman, and James F. BROOKLYN GAS COMPANY. Avenuents Bafore the Attorney-General

on the Petition to Annul Its Charter. ALBANY, Aug. 10.-The consolidation of seven sas companies of Brooklyn into one corperation, under the name of the Brooklyn Gas Company, was reviewed at a hearing before Attorney-General Hancock to-day. The matter came up on an application of John C. Lester, asking the Attorney-General to institute roceedings against the consolidated corporation and against the individual companies, which were combined into one corporation to appul their charters, and to restrain such terperation from violating the Anti-Trust law. Paul E. Defere appeared for the petitioner and William F. Dykman of Brooklyn and Thomas Thatcher of New York represented the

Brooklyn Union Gas Company. Mr. Defere said that the application was made for the reason that the several companies were combined in order to either raise or maintain the present price of gas in Brooklyn, and that the consolidated corporation operated as a monopoly in restraint of trade, and thus violated the Anti-Trust law of the State.

Counsel for the Brooklyn Union Gas Commany said that the petition of the applicant involved nothing substantial as against the company, except that it took conveyances of the properties and rights of the several other companies. Mr. Thatcher said: "If this was authorized by law, then there is no charge in the petition as against it of anything which could be made the ground of an action to vacuate its charter and annul its existence. No law was violated in carrying out the intention of the Brooklyn Union Gas Company. It sainot be claimed that a mere contract of prehase by one corporation from another, which, only by reason of the transfer of ownsthin, affects the power of any one to do business, is a contract whereby competition is retrained or prevented.

It is not true that the contracts of purchase of the contract of the contract of purchase of the contract of the contract of the contract o made for the reason that the several companies

which, only by reason of the transfer of ownshin, affects the power of any one to do business, is a contract whereby competition is restrained or prevented.

It is not true that the contracts of purchase of the conveyances were made "for the purces of advancing sprices." Not only was there no combination of corporations involved in the purchases made by this company, but such purchases were not for the creation of a manopoly, or the unlawful restraint of trade, or for the prevention of competition in any measury of life. Gas is not a necessary of life. Gas is not a necessary of life. That to buy out the property and business of another is not unlawful, as creating a manopoly, as restraint of trade, or preventing empedition, is no longer open to dispute unfer the decisions in this State. If it be assumed that by accepting the conveyances from the other commanies the Brooklyn Union size (company viclated the law, so that a ground fee forfeiture exists, still the public interest does not require that an action be brought to annul its existence. What has been accomplished has worked to the benefit of the Brooking public. The price of gas has not been increased. On the other hand, the illuminating lower has been improved. A reduction of friess to the city and the people is in contemplation, this company being ready and willing lower has been improved. A reduction of the seven companies did not do away with empetition as no competition had existed, such company operating in a different part of Brooklyn. The consolidation of the seven companies was made more with a view of konomy in management than anything else.

Mr. Dykman said that the consolidation of the seven companies, and bench as a repital and bond issue agregating \$50,000,000, all but \$500,000 of which was issued for the stock and bonds of the seven companies.

Mr. Defere decided this, and said he had no post that the Mutual Company could secure and contract was a stockholder in the Mutual Gas said the parmission of the Brooklyn Common Council to operate in

LEMON IMPORTERS' BIG LOSS.

They Were Hard Hit by the Fallure of the

Sicilian Crop. The season for importing lemons from Sicily, which began last October, has closed with very great loss to American importers, and United States Censul Caughy, stationed at Messins. States Censul Caughy, stationed at Messins, has made a report in which he estimates the less at \$1 a box on 2,500,000 boxes. The large importers here said vesterday, however, that this estimate was too large, although the setting has was so great that only the profit made on the oranges from Sicily had saved many of the importers from being forced. On the wall.

The heavy rains of April and March are said to be the chief cause for the failure of the genon crop. This rain prevented healthy growth and a yield of soft fruit was the result, This soit fruit would not stand transportation and much of it, upon which importers had advanced from \$1 to \$2 a box, was landed here in a worthless condition.

Although elightly higher prices for American

stocks in London indicated an improvement in the tone of that market, the bears resumed

operations here with fully as much confidence

as they conducted their campaign last week.

They caused it to be announced in advance of

the opening of the market that certain of the less important Industrials would be attacked; and as American Tobacco and United States Leather have been particularly vulnerable for some time and have never enjoyed the support of general buying no difficulty was experlanced in marking down the prices of those stocks several points. Sugar Refining also broke sharply, and so did Manhattan Railway.

A particularly vigorous attack was made upon St. Paul, apparently upon the theory that if

that stock could be made to sell at 60 a large number of stop orders would be uncovered.

It sold at 59% but the stop orders were not

there, and in consequence the price immediately recovered. Before the expiration of the first

hour of business it became apparent that a change in sentiment had taken place

in certain quarters. Fears that a default or two might be made in effect-

ing setlements at the Stock Exchange Clearing House were dispelled, and it soon became plain that borrowers on call could obtain all the

accommodations they required at the legal rate. That rate was established as the renewing rate

on call loans early in the day by banks, trust

companies, and other lenders, and it proved to

be the ruling rate for the day. A few overanxious borrowers paid 8 % cent. for \$150,000 soon

after the money market opened, and loans ag-gregating \$300,000 were made at 7 % cent. The

amount of business done at the final rate of 3

A further decline in the foreign exchange

market was the most important development. The rates for money prevent importers from

securing upon advantageous terms accommo-dations for liquidating their indebtedness

abroad, and they are therefore practically out of the market for exchange. There is no de-

mand from bankers, as London bought a few stocks to-day, about 15,000 shares. On the

other hand, a very fair supply of commercial

bills is coming to hand, and drawers are dis-

posed to sell freely because of their arrangement with the so-called foreign ex-

change syndicate. Drawings were especi-

ally influenced to-day by higher rates for

money. The appearance of a moderate

demand for stocks from actual buyers or for speculative long account, together with the

circumstances already noted, turned the course

of prices and influenced quite a little buying to

cover short contracts. In the last hour the market was almost buoyant, and, except in the

cases of a very few stocks, all of the early losses

were recovered. A number of the more active

shares, among them Sugar Refining, St. Paul, Louisville and Nashvile, C., B. and Quincy,

Southern Railway preferred, Western Union,

Rock Island, Chicago Gas, and Manhattan Hall-

W cent, was unimportant.

Shipments of money to the interior to-day were much lighter than last week. New Orleans has begun to receive Treasury warrants for the sugar bounty, and in consequence the banks there are becoming flush. Chicago appears to bave obtained all the money it needed in connection with the Moore failure, and shipments of currency to that centre to-day are normal.
